STATEMENT OF RELEVANCY

References AO(JP 5-233877) , AP (JP 6-068305) and AQ(JP 3-108079) on PTO-1449

These references are cited in the specification.

It is believed that the references AO-AQ fail to teach or suggest a character recognition method which extracts a cross section sequence graph from a character string image, analyzes a singular region of the cross section sequence graph to generate a virtual boundary point sequence in the singular region based on an analyzed result, generates character candidates by combining structural elements of the cross section sequence graph and recognizing one character by supplying the virtual boundary point sequence with respect to the generated character candidates if necessary, and recognizes a character string based on an adjacency relationship of the character candidates which are recognized as one character.
